Office Action Summary	Application No. 10/579,991	Applicant(s) MICHIOKA ET AL.	
	Examiner William C. Joyce	Art Unit 3656	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This is the First Office Action in response to the above identified patent application filed on October 12, 2006.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: The references to specific claim numbers throughout the written disclosure (for example, page 4, line 4) should be removed because the claim numbering can change during prosecution. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2, 4/1, 4/2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuasa et al. (USP 5,634,722) in view of Lambert (DE 199 61 225).

Yuasa et al. discloses a guide apparatus having a track rail (1), on which rolling-element raceway surfaces are formed along a longitudinal direction thereof, and a moving block (2) attached to the track rail by way of a plurality of rolling elements in a relatively-movable manner, the moving block having load rolling-element raceway surfaces forming load rolling-element raceway passages in conjunction with the rolling-element raceway surfaces, a moving block main body in which rolling-element clearance holes corresponding to the load rolling-element raceway surfaces are formed, and side covers (5) attached to each end of the moving block main body with respect to the direction of relative movement, wherein the side cover include a sealing device.

The prior art to Yuasa et al. does not disclose the sealing device configures as a dustproof brush. The prior art to Lambert teaches a linear guide device having an end-face dustproof brush, which has a brush member whose tip end contacts a surface of the track rail and which eliminates extraneous matters

adhering to the surface of the track rail by means of the brush member, is attached to outside of each of the side covers with respect to the direction of relative movement. It would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the sealing device of Yuasa et al. with a dustproof brush, as taught by Lambert, motivation being to prevent a predetermined size and amount of dust from entering the moving block.

Allowable Subject Matter

6. Claims 3, 4/3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the brush member of Wilcox (USP 3,494,673).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Joyce whose telephone number is (571) 272-7107. The examiner can normally be reached on Monday - Thursday 7:30-5:00.
